ABOUT THE PROGRAM

This program was designed as a way to build a solid operator base of fitness. We pulled material from these sources: Mark Twight (gymjones.com), Rob Shauls (mtnathlete.com), Greg Glassman (crossfit.com), Dan John (Google him) and Scott Ramsdell (athleticperformanceinc.biz). We combined the idea behind the Gym Jones 3 month operator fitness program, a lot of Mountain Athlete workouts, some Crossfit WOD and API workouts and turned them into a 4 month workout program that has numerous options each day so that you could use it for 2-3 rotations and not become bored with it.

Our goals specifically in making this program are to be able to DL 2.5x, Front Squat 1.5x, Bench 1.5x, Military Press 1x our BW and still be the cardio shape to run 3 miles easily in under 20:00. Also, we will have a score of at least 200 on the SSST. Whatever your individual goals are just tweak this program towards them in order to achieve them within 4 months.

Mountain Athlete is a great new reference for Team guys, especially Lead Climbers for sport/job/event specific workouts. This website is a great source for new workouts that you can add continuously into this program. They started in February 2007 and are based in Jackson, Wyoming. API is another up and coming gym, there is one starting soon in VB, apivirginiabeach.com that run by a Team guy and his wife. Thanks to all for

providing workouts.

Most of the Sport Specific workouts were created by us, the Horsemen, and if you don't like them then fuck you, you're a pussy. These are really the only original material in this entire document almost everything else was copied from existing programs run by professionals who know what they're doing and cobbled together by us.

The suggested playlist was created by us and we stand by it. You will be able to lift more for a longer period of time if you listen to what we've suggested and again, if you don't like it, fuck you, you're a pussy.

We subscribe to the philosophy that Team guys need to be physically ready to handle any task and therefore it is imperative for us to have an elite level of fitness over a broad base. We are obviously not Olympic Weightlifters, Sprinters, Marathon runners or World class mountain climbers. However, we do need to be able to function at a slightly less elite level in each of these disciplines (i.e. throw a lot of weight around, sprint to HLZ's, and operate in extreme environments.) This program is designed to meet and exceed these goals.

So if you're not pussy and looking for a new, interesting, challenging workout program, enjoy!

SECRET SERVICE SNATCH TEST

Perform as many KB snatches as possible in 10 min, alternating left and right hand as desired, KB may be set down to rest if necessary, those are "Official" (Gentlemen's rules). "Tier One" rules dictate that the KB may not be set down during the 10 min effort, only one transfer swing is allowed to change hands, and any rest must be taken with the KB held overhead in the locked-out position. Men use the 53# KB.

RILEY BLACK (3X-5X Ladders from 1-3 with Progressive Loading) (18-30 reps total)

Rather than a fixed set (e.g. 6 reps), a ladder increases by 1 rep within the rep range (e.g. a ladder 1-3 means 1 rep, then 2 reps, then 3 reps). Do the reps within the ladder without rest but allow a meaningful rest period (no less than 3 min) between the ladders. Use progressive loading by setting up three bars: #1 = 95% #2 = 90% #3 = 85%. Weight decreases as the reps increase.

All reps must be technically perfect. Utilize this method with the following movements:

(Bench Press, DL, Front Squat, OHS, Standing Military Press, Squat, Weighted Pull ups)

BREATHING LADDER

A Breathing ladder under 30 min can be considered a Power Endurance while a breathing ladder over 30 min can be considered an Endurance under 90 minutes.

Repetitions:

1-20 (or more), add one rep at each successive rung of the ladder

1-20-1, add one rep at each successive rung of the ladder up to 20 and then descend, this gets very scary around rung number ten on the way down

1-10 repeats add one rep at each successive rung of the ladder up to 10 and then repeat the ladder beginning with 1

The stopping point for a properly executed Breathing ladder occurs when the athlete can no longer perform the movement with the allotted number of breaths.

DEFINITIONS

BARBELL COMPLEX – 6 REPS OF EACH

Dead Lift (DL)

Bent over Row

Hang Power Clean

Front Squat

Push Press

Back Squat

Push up

Grab the barbell, sprint through…don't put the bar down till the pushups. Typically you will do 4 rounds of this complex and load the bar progressively through each. If you are working on Working Load Strength then use (85#, 95#, 105#, 115#) as a start point and go higher or lower in weight depending on your goals and overall level of fitness.

SLASHER TO HALO – Start with both hands cradling the handle as if you were doing a goblet squat. Drop the KB down to your right hip. Slash it across your body to your left shoulder then continue to move the KB around the back of your head and bring it over your right shoulder then slash it back down to your left hip, then repeat the movement in the opposite direction.

TOURKISH GET UP – see crossfit.com "how to" videos. Lay on your back and press the weight straight up like a bench press with one arm, keep full arm extension while you get up to your feet, arm always remains extended straight overhead. Once you have come up to a standing position you lower yourself back down to the start point (that's one rep) and repeat. You can either transition to a knee on the way up and down or if you want to make it more difficult come straight up to the standing position.

JINGLE JANGLES – 5 yard back and forth sprint. Set up 2 cones and sprint back and forth between them, touching the ground at each cone.

12 MINUTE KB COMLEX – There are multiple 12 minute KB complexes that can be done for a warm up, it's up to the individual operator's imagination as to how many different combo's you can come up with.

The most common are:

Around the world, figure 8's, snatches and step ups with a 53# KB; 1 minute of each, 4 rounds, do not put the KB down during session.

1 arm swing, figure 8, 1 arm swing, figure 8, 1 arm Clean/Press, Slasher to halo, 1 arm Clean/Press, Slasher to halo, KB

snatch, Lunge, KB snatch, Lunged (1 min of each @ 35#)

WIEGHT LOADING – If there's no load prescribed (or height for box jumps) then it's on you to do what you feel you can for the workout. If you've been killing yourself and you need a break then go light. If it's low reps with low number of rounds then the exercise should be performed at a higher weight.

FINGER BOARD – The finger board can be found in Pad # 2 first section of Camp Lewis. (Order online from REI for about $80)

DUMBELL CRAWL – Bear crawl while holding DB's.

LEG BLASTER – 1X =

20X Squat

10X Lunges each leg

10X Jumping lunges each leg

10X Squat Jumps

MINI LEG BLASTER IS ½ OF A LEG BLASTER (REDUCE EACH NUMBER BY ½)

Rock, Squat and Carry – Pick up heavy Rock and Squat 3x, and carry 100m

WTFYFLDOYOFT – Whatever the fuck you feel like doing on your own free time.

If you are unclear about something or don't understand the workout then pick a different one or be a Team guy and make it up.

CURTIS P – At Prescribed Weight

Hang Squat Clean (HSC)

Lunge Forward Right leg

Lunge Forward Left leg

Push Press

MR. SPECTACULAR – 2 Hand KB Clean/Press then put down KB's and walk out on hands into push up position, do push up, walk back up on hands and grab KB's then repeat.

SHOULD MOBILITY DRILL (SAM) – use PVC pipe

5x Pole Press

3x Halo

5x Overhead Squat (OHS)

HALF MOONS – Put a sandbag on one side of your body, reach over, pick it up taking it high over your head, and placing it down on the other side.

RENAGADE MAN MAKERS – Take 2 Dumbbells (DB), usually @ 25# and start standing up with DB's on ground. Kneel down and grab DB's, do a power clean and press with them, then drop down into push up position, do push up, then row once with each arm. Bring legs back up underneath you and repeat. (Check out gymjones.com for pictures)

SANDBAG DOUBLE EAGLE (you have one sandbag and a tire set up for drag) – Clean Sandbag to shoulder, pull it around neck and do 10X deep squats and drag tire/sled forward 40 ft with bag on shoulders. Put SB in tire and drag to start point (SP), pull backwards.

When you see the # sign it's an easy way to type pounds, i.e. 53# KB = use 53 lb Kettle ball.

When you see the @ symbol it just means "use", i.e. @ 2x 53# KB = use 2 53 pound Kettle balls for this exercise, it can also mean "at", i.e. @ 85% 1RM = do this exercise at 85 percent of you 1 rep max.

Almost any workout that can be done with a KB can also be done using a DB.

HSPU – Hand Stand Push ups

Mutant Maker = Clean to Thruster

HSC – Hang Squat Clean

KB PULL – Grab single or dual KB's and perform the same movement as a Sumo Dead Lift High pull

SDHP – Sumo Dead lift High Pull, Feet are out wide, hands gripped close together on barbell. Perform an explosive movement up so that hands come up right under the chin and elbows are up high by head. The first part of the movement is similar to a DL, like the name implies, and then the explosive movement similar to a clean or snatch except feet do not come off the ground.

OHS – Overhead Squat, Bring the BB/DB/KB up above your head with your arms locked out and perform a deep squat.

THE EXERCISE – Designed by Dan John, perform a snatch and without bringing the weight back down perform an OHS. That's one rep.

DB – Dumbbell

BB- Barbell

KB - Kettle bell

If you don't have a Rope to climb to do the exercises as prescribed then do 10x Pull ups instead.

If you have no sled do 40 sec. Jingle jangles, (5 yard sprint, back and forth) instead.

If you have no balls, then you're a girl.
